

## RTT B Csop Manual Testing

The test cycle in **Jira Zephyr Scale** have been created by the following test categories:

- Appearance Tests
- Authentication Tests
- Function Tests
- User Acceptance Tests

The test cycle consists of total 23 test cases for the 1.0 release.

Upon executing test cases, there was some defects raised e.g. RTT-1, it has been reported and assigned to the responsible developers, which was later corrected, retested and set as pass.

No regression tests for 1.0, since this is the first release of the website, it is scheduled in the next cycle for the 1.1 release.

All User Acceptance Tests (7) based on user stories in the product backlog have been executed and passed.

The product is ready for release.
